Access to scientific information

LITHUANIAN RESEARCH LIBRARY CONSORTIUM
LIETUVOS MOKSLINIŲ BIBLIOTEKŲ ASOCIACIJA

www.lmba.lt

The main goal - Subscription to electronic databases for the Consortium members

- 49 members (universities, colleges, research institutes, LNB,...)
- EU SF projects:
 - eMoDB.lt, 2009-2012, €8,7 mln.
 - eMoDB.lt2, 2013-2015, €8,5 mln.
 - eMoDB.lt3, 2016-2020, €31,5 mln.
- Institutional cofinancing – 15%
- 76 databases

<https://elaba.lt>

The main goal - development, maintenance and management of information systems in academic libraries

Dissemination of research output worldwide

eLABa consists of:

- ILS Aleph/ExLibris
- Virtual Library Portal (Primo/ExLibris)
- **Database of scientific publications** (home made)
- **Repository** /Fedora (open source)
 - ETD documents
 - Full text articles, e-books, etc.
- ESAS - text overlap detection system /plagiarism detection/ (open source/home made)
- 50 members (universities, colleges, research institutes)

Elaba PDB: Submission of Publications to DB

University regulation:

- Library is responsible for research output DB management
- University Research Dept. accepts scientific publications if they are indexed and included in the Publications DB
- Information on publication must be submitted to the Library within 5 days after it has been published
- “green OA” full text PDF are submitted to repository and links are provided to Gold OA articles

Library Services for Research Output Management

- Lists of Publications for:
 - Doctoral committees, PhD students
 - Research projects
 - Job competitions
 - Certification and licensing medical doctors
- Reports
 - Annual statistical reports for University and departments

In 2018 prepared 5 214 of various reports
(~20 reports/day)

Annual reports for departments

Type of Publication	Lietuvos sveikatos mokslų universitetas				
	# of publications	# of all authors	# of Dpt. authors	Part of Dpt. Authors contribution	Contribution of Dpt. authors in %
Monographs, Studies (K1a, K1b, K1c)	2	34	25	0,785	39,25%

- Information is provided to University Research Fund for covering APC
- Consultations and Selection of journals to authors for publishing articles

Analytical information from *InCites*

- Providing reports on national and international collaboration

More services

- Using PubMed database, lists of foreign authors' publications are created for:
 - Doctoral committees
 - For international project applications
- Submitting “green OA” full text articles to the repository according Sherpa/Romeo
- Submitting University e-books to the repository

Problems

eLABa PDB / repository does not correspond university needs and it is not a CRIS

- No harvesting, no data import from DB, manual metadata creation
- No researcher profiles
- No metrics, analytics
- No integration with external IS (ORCID, Sherpa/Romeo, WOS, Scopus, etc.)
- user-unfriendly, slow, no future...

What's next?

- Commercial Pure, Elements,...?
- Open source DSpace/CRIS, EuroCris?
- Library platform ALMA-Esploro?
- New home made IS?

DSPACE CRIS: WHY?

- A CRIS enhanced repository platform
- Open source software (Cineca, IT)
- Compliant with open standards CERIF, OAI-PMH, Dublin Core, etc.)
- Integration with external IS (ORCID, OpenAIRE, etc.)
- effective tool to manage research information:
 - researchers' profiles,
 - department pages,
 - project grants & awards,
 - research outputs
 - generation of reports for departments, ministry, personal for various purposes
 - data for professional certification, generation of attestation cards
- Metrics (views, downloads, citations, altmetrics)

Title: A strong regioregularity effect in self-organizing conjugated polymer films and high-efficiency polythiophene: fullerene solar cells

Authors: Choulis, Stelios A.
Kim, Youngkyoo
Cook, Steffan

Keywords: Polymers
Fullerenes
Nanostructured materials
Plastic films
Solar cells

Issue Date: 2006

Publisher: Nature

Source: Nature materials, 2006, Volume 5, Issue 3, Pages 197-203

Abstract: The influence of polymer regioregularity (RR) on the molecular nanostructure, and on the resulting material properties and device performance was analyzed. Annealed blend films show increased α regardless of RR, that indicates improved charge-carrier diffusion. It was found that the highest device efficiencies will be achieved with the highest RR P3HT. It was also found that the dark-current density of as-fabricated devices made with pristine P3HT increases with the RR of P3HT in the higher voltage regime

DSPACE-CRIS aggregated statistics

The background is a solid blue color with several large, overlapping circles in a lighter shade of blue. These circles are arranged in a way that they overlap each other, creating a pattern of varying blue tones. The text "Thank you for attention!" is centered in the middle of the image in a white, sans-serif font.

Thank you for attention!
